system

Any use case

You can use TensorFlow
datasets

[https://www.tensorflow.org/datasets
/catalog/overview](https://www.tensorflow.org/datasets/catalog/overview)

Explore Advanced Features

Setup

Cloud (Azure, AWS), on-premise

- <https://www.kubeflow.org/docs/started/cloud/>

Advanced authentication

- <https://www.kubeflow.org/docs/components/multi-tenancy/design/>

Kustomize

Kustomize based customization

- <https://github.com/kubernetes-sigs/kustomize>

Katib

Advanced hyperparameter tuning strategy

- <https://www.kubeflow.org/docs/components/hyperparameter-tuning/hyperparameter/>

Pipeline

Kubeflow pipeline

- Build pipeline for your projects
- Integrate with output artifacts

CI/CD pipeline

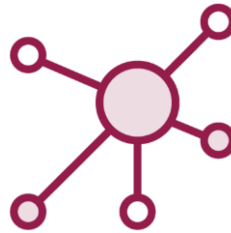

- <https://argoproj.github.io/argo/>
- <https://github.com/marketplace/actions/kubeflow-for-ci-cd>
